Safe & Modern Schools for All D11 Students & Staff

Through a multi-year effort talking with families and teachers at every school, D11 has heard a consistent message: our aging campuses are overdue for an investment that matches the modernization of neighboring districts. Many of our buildings are more than 60 years old and need urgent repairs to roofs, plumbing, electrical systems, and air-quality systems.

To address these needs, the D11 School Board is considering placing a \$775 million bond measure on the November 2026 ballot to repair every school in the district — an investment that would also free up existing funds to increase teacher pay. At an average cost of approximately \$252 per year for the typical homeowner, the measure would include independent citizen oversight and, by law, could not be used for administrator salaries.

How Bond Funding Could Be Used

If approved by voters, funding from the proposed bond measure could be used to:

-  Improve school safety and security systems at every campus
-  Remove hazardous materials like asbestos and lead pipes from older school sites
-  Install modern heating, cooling, and air-filtration systems
-  Update classrooms and labs for science, technology, engineering, and in-demand trades
-  Repair deteriorating roofs, plumbing, and electrical systems
-  Free up existing operating funds to increase teacher pay and retain great educators

Local Control & Accountability

- ✓ All funds stay local — funding cannot be taken by the State or Federal Government
- ✓ By law, no money can be used for administrator salaries
- ✓ An independent citizens’ oversight committee and annual audits will ensure funds are spent as promised
- ✓ Funds can only be spent on the school repair and modernization projects identified in the measure

We Are Learning By Listening

Before any measure is finalized, D11 wants to hear directly from our community. Your responses to this short survey will help the School Board understand which facility needs matter most to our community. For more information, including proposed plans for each school, please visit: D112026BondPlanning.com
